

VEO-SCHOOL combines high security level, advanced features, high performance and ease of use to get the fastest, most robust, stable and secure, full featured and high performance school management system on the market today.

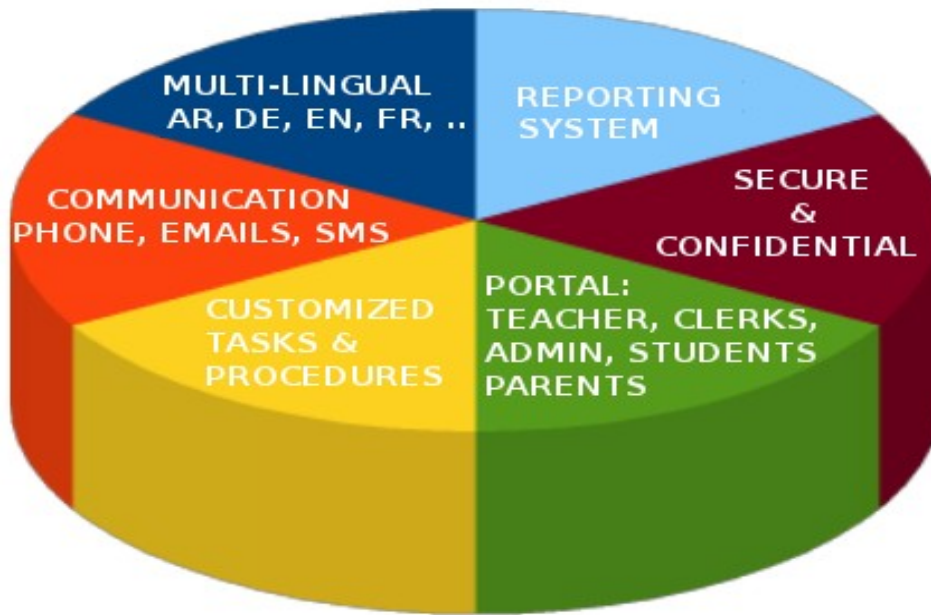

VEO-SCHOOL is an enterprise-wide, web-based, education data management system, providing parents, students, clerks, administrators and teachers access to real-time information to effectively assess and support student achievement.

VEO-SCHOOL is completely customizable and scalable to the individual needs of each implementation, whether it be a school district, an educational service agency, a state, province, territory, or country.

VEO-SCHOOL is a complete bundle containing all the fundamentals required for a robust student information system, offering a one-stop-shop for all your student information needs, from registration, to grade reporting, discipline and scheduling.

VEO-SCHOOL includes a comprehensive list of feature-rich, seamlessly integrated modules and building the ultimate student information system to meet your needs.

VEO-SCHOOL is available in many languages, granting users access to the robust features of the student information system in different languages.

SCHOOL MANAGEMENT

Fully featured information management system that avoids duplication of administrative tasks across multiple systems:

- ◆ Role-based permissions control access depending on individual staff responsibilities.
- ◆ Manage students across multiple platforms.
- ◆ Track applications through every stage of the admission procedure.
- ◆ Integration with a Learning Platform for on-line delivery and management of teaching materials.
- ◆ Transport bookings for school bus routes.
- ◆ Membership of extra-curricular clubs and activities.
- ◆ Teachers, parents, management, clerks, students Portals.
- ◆ One central management system.
- ◆ Multi-Languages.
- ◆ Customizable.

MESSAGING

Replaces internal memos with automatic emails to staff and saves money and time when sending home everything from trip letters to the school newsletter:

- ◆ Emails triggered to relevant staff for incidents and comments about students.
- ◆ Daily notification to parents of unjustified absences.
- ◆ Options to email parents with comments about their child's activities and behavior.
- ◆ Bulk emails with attachments to parents of any group of students.
- ◆ SMS Texts to parents for emergencies.

STUDENT DATABASE

An intuitive web interface provides access to the profile of every student including:

- ◆ Custom data fields to match your school application form.
- ◆ Real-time statistic and demographic reports.
- ◆ Lists of students with any medical concerns, dietary needs or allergies.
- ◆ Emergency contact details.
- ◆ Printing of address labels.
- ◆ Easily customized views for printing or export to spreadsheets, pdf.

REPORTING

Both academic and pastoral student tracking, with a reporting system that leaves teachers more time to teach:

- ◆ Attainment grades, scores and skills-based assessment profiles.
- ◆ Analysis tools for tracking attainment linked to the National Curriculum.
- ◆ Setting and monitoring of student homework.
- ◆ Attendance, lateness and reasons for absence.
- ◆ Merit points and House system.
- ◆ Be-spoke report templates to match each schools publication style.
- ◆ Sanction tracking for formal Incidents.

BENEFITS

VEO-SCHOOL is a robust and feature rich student information system. Some of the key features and benefits include:

- ◆ **Single Student Record:** Track student data, via a unique student ID number
- ◆ **Teacher Portal:** Allows teachers to view, enter and report on a wide range of student information from grades to attendance to curriculum standards achievement
- ◆ **Multi-lingual:** With field level control capabilities
- ◆ **Parent Portal:** Provides parents access to selected student information online and ability to interact with school staff
- ◆ **Standardized Testing:** Adheres to standard testing requirements and provides the ability to import student test scores

IMPLEMENTATION & SUPPORT

PolyVeo has a proven implementation methodology and experience in ERPs, CRM, SIS implementation for our local and international markets:

- ◆ Experience in SIS implementation in many countries
- ◆ Support in data planning, project management, technical and training requirements
- ◆ Dedicated support team and Help Desk

FEATURES

Demographics and Personal Data:

- ◆ A school can customize the fields of demographic and other data stored for each person.
- ◆ Each field can store textual, date, boolean (yes/no) data, or a selection from a list of defined choices.
- ◆ Fields can be assigned specifically to teachers, students, administrators, or all people.

Contact Management:

- ◆ Personal contact information includes address, phone, email, and contact language.
- ◆ Each student can be associated with one or more adult contacts. multiple students can be associated with a single contact.

Attendance & Participation:

- ◆ For each meeting of a class section, teachers can mark students absent, tardy, or assign a numeric participation score.
- ◆ The average participation score can be included in Gradebook calculations.
- ◆ Absence and tardy data can be included in report cards and other provided school attendance reports.

Gradebooks:

- ◆ Gradebook for calculating point or percentage based grades.
- ◆ Provides a spreadsheet-style gradebook for each class section.
- ◆ Each gradebook can be organized as multiple worksheets.
- ◆ Assignments and activities can be organized and weighted by categories, such as “Exam” or “Lab,” which can be customized for each site.
- ◆ Point-based scores can be converted to grades using flexible, customizable “score systems.”
- ◆ Scores are viewable by students, if they are given permission to log into system.
- ◆ Scores can be exported to .xls spreadsheet format.

Skills & Assessments:

- ◆ Create documents specifying student skills, standards, or outcomes via spreadsheet import or through the web interface.
- ◆ Associate groups of skills with courses automatically or manually.
- ◆ Create projects with unique combinations of skills.
- ◆ Assess student skills through a familiar gradebook style interface.
- ◆ Track the history of student skill achievement across multiple sections and school years.
- ◆ Teachers and administrators can generate graphical reports by student, section, or teacher.
- ◆ Skill scores can be integrated into the gradebook.
- ◆ Skills reporting.

Data Collection & Report Cards:

- ◆ Grades, comments, and other teacher-generated data can be collected school wide and aggregated using the gradebook interface.
- ◆ Standard report cards can be generated as PDF documents for individual students, groups, or the whole school.
- ◆ Customized report cards can be designed using an HTML-like markup language.

Calendars, Groups & Individuals:

- ◆ Automatically creates a web-based calendar for every person, group, resource, and section.
- ◆ Person calendars are private. By default, group and class section calendars are visible only to members.
- ◆ Like iCal, Google Calendar, and other popular calendaring applications, VEO-SCHOOL allows users to “overlay” events from other calendars on their personal calendar.
- ◆ Calendars are aware of the school timetable: by default new events will start and end at the beginning and end of class periods.
- ◆ Users can create single or repeating events.
- ◆ Teachers can edit section events to note tests, assignments, and other class information.

Tracking & Interventions Management:

- ◆ Create goals and track progress collaboratively between students, teachers, parents, and other stakeholders.
- ◆ Simplified competency tracking—Teachers can rate an entire class on one or more competencies as soon as the competency is taught.
- ◆ One-button reporting—Teacher reports provide information by class and individual student.
- ◆ Administrator reports provide information by instructor or by program area.
- ◆ Assignment rating—Teachers can create assignments that incorporate several competencies.
- ◆ Capture complete demographics to satisfy state or federal requirements.
- ◆ IEP tracking—Teachers can identify and rate students based on individual education plans and maintain all student records in one system.

Importing and Exporting Data:

A variety of ways to import data into the system, in addition to its web interface.

Security:

Our custom security model manages permissions based on role (teacher, school administrator, ...) and relationships.

Supports using Central Authentication Service (CAS)**Report-Lab PDF generation.**
